

Associa a ciascuna funzione il grafico:

$$y = \left| x^2 - \frac{9}{2}x - \frac{5}{2} \right| \quad (\mathbf{a / b / c / d})$$

$$y = \left| x^2 - \frac{9}{2}x - \frac{5}{2} \right| \quad (\mathbf{a / b / c / d})$$

$$y = -\left(x^2 - \frac{9}{2}x - \frac{5}{2} \right) \quad (\mathbf{a / b / c / d})$$

$$y = x^2 - \frac{9}{2}x - \frac{5}{2} \quad (\mathbf{a / b / c / d})$$

Quali sono gli zeri delle quattro funzioni?
